

Allsops

CASE STUDY

With its beautiful and classical period interior Allsops presented an interesting challenge.

The team was selected, finished in white and Stilo Walnut with plain white acrylic screens, the look was very pleasing and complimentary to the interior.

Personal storage was an important element and the perfect solution was the tower desk supporting pedestal. These popular units offer enhanced workplace storage and the additional benefit that the top offers additional work surface area when used open, they fit neatly into the allocated workstation footprint, a great idea.
