Warehouse &  
Distribution

Designed & manufactured  
for today's working environment

Task Systems know that satisfaction can only be achieved by offering outstanding service.

Our State of the Art distribution centre in South East England is designed to support the needs of our UK and European customers. With fully computerised stock control systems and extensive stock holdings, the needs of clients both new and existing are managed from this powerful resource.

Task's Transport fleet and Installation Teams are based here and work in partnership with our Project Management Department to make this the Hub.
