SPECIFICATION / FINISHES

MFC HOXTON STORAGE

MFC HOXTON STORAGE SPECIFICATION

Hoxton offers a wide range of functional, yet attractive office storage solutions.

Constructed from 18mm MFC carcasses with 25mm tops and plinths. High impact 2mm PVC edging is applied to all tops and doors, 0.8mm edging on the carcase. All storage units include height adjustable feet. 25mm MFC shelves, metal lateral filing shelves and pullout filing frames are mounted on ladder strip and are ordered separately.

Cupboards 1600 high and above come complete with an Espagnolette locking system. Cupboards under 1600 high use a different rim lock and plate system where Espagnolette or slide bolts are not necessary. The doors hang on steel 110 degree opening, fully adjustable hinges and come with 234mm centre silver bar handles.

Durable co-ex smooth double slat Tambour doors are available in white or silver and are both light-weight and rigid. The lockable side closing doors have an aluminium / steel slam with magnetic closure and black inset handles. The tracking and trim also come in black.

HANDLE OPTIONS

Bar Handle - Stainless Steel Effect

U Pull Handle - Matte Black

U Pull Handle - Polished Chrome

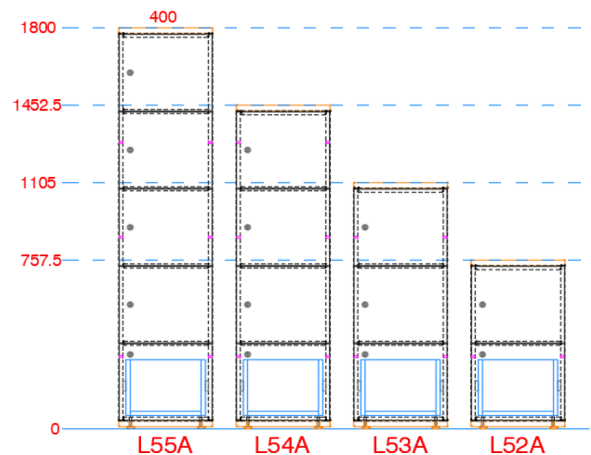

MFC LOCKERS

LOCKERS SPECIFICATION

The Task locker range offers a variety of individual module styles in 400mm and 800mm widths. Module height options start at 1800mm high and are categorised based on the door height (number of compartments) this original height is split into. The categories are L5, L4, L3, L2 and L1.

Category example (right) : L5 category modules are heights based around the 1800h split into 5 equal door heights of 343mm. Each module height option in this category drops down one door height (compartment) for each level. Each L4 module is based around heights of an 1800h split into 4 equal door heights...L3 is 3 equal splits and so on... Modules must be finished with exterior 25mm top and base panels that include height adjustable feet. These panels finish flush with module lengths and can be ordered in various sizes to sandwich different length runs of combined modules of the same category.

The module style options in 400mm and 800mm widths are:

Lockers - Standard compartment door lockers with the category height options. Doors are all RH hung with a choice of 4 lock types and optional number discs. The L5 and L4 category lockers are available as all doors or to have a pull out drawer compartment at the bottom only for ease of access. All drawers include a 75mm profile pull handle, available in all Task standard powder coat finishes.

Open Shelving - As above lockers but without doors / drawer. 800w modules have no central divider.

Shelving/Full height doors - As above but with full height non-locking doors. Include knob handles that align with lock positions throughout the range.

Open Hanging - Open carcass with top hanging rail. Available in suitable heights for hanging.

Hanging/Full height doors - As open hanging but with full height, non-locking doors with knob handles.

Seating - A selection of open topped modules with a fabric seat cushion (ordered separately) and back support. Heights available to suit all category options plus a universal seat only module with no back support that can be used as part of any run combination. Seating units cannot connect directly into top panels, but top panels can straddle seating units and connect into modules on either side. This will obviously restrict head room on lower module heights, so we only advise this for seating modules at 1800h.

All module types include fittings for fixing top and base panels as well as connecting into the adjoining module on a run.

LOCKERS SPECIFICATION

All module styles are available in your chosen carcass and door colour combination. However, there are a couple of restrictions with the three 18mm ONLY MFC colour options. This is because the 800w modules contain a 25mm thick central divider panel.

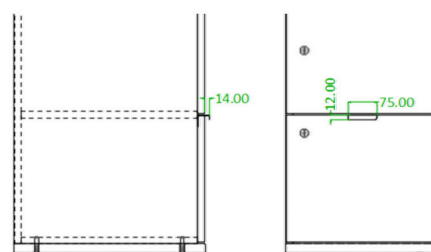

75mm PROFILE HANDLES - INCLUDED ON ALL LOCKERS BOTTOM DRAWER COMPARTMENTS ONLY

RAL9005 Black

RAL9016 White

LOCK OPTIONS

Lockers are available with a variety of lock types. Apart from the standard Type A key lock, all other locks can be ordered to be set up as either Private mode or Public mode.

Private Mode - The lock is secured and opened used a single programmed code.

Public Mode - The lock can be secured and then opened with a user selected one time code.

Once unlocked the lock defaults back to open public mode ready for input of next one time code.

INCLUDED IN THE PRICE OF LOCKERS- CHROME LOCK TYPE A

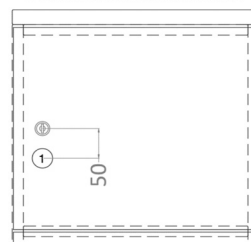

NUMBERING OPTIONS

All module types with doors are available with or without number discs by adding a '0' or '1' to the product code as shown below. The number discs have a self adhesive backing and are positioned on site. The doors are routed with a rebate to accept disc and enable quick and accurate positioning.

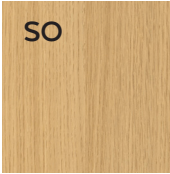

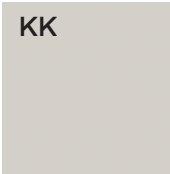

- Ø33 disc made from high quality Stainless Steel
- Engraved and painted filled for quality
- High strength adhesive backing to deter removal

MFC HOXTON STORAGE / LOCKERS

CARE & MAINTENANCE

MFC STORAGE/ LOCKERS CLEANING INSTRUCTIONS

The life and good looks of your furniture can be greatly extended by regular cleaning and maintenance. Task Systems Ltd recommends the following procedures be adopted to protect your furniture.

- Regular cleaning with a lightly dampened cloth is all that is required to clean MFC. Excessive amounts of water should however be avoided as this may caused damage to the finish.
- We strongly recommend that proprietary furniture polishes containing silicon be avoided. These will after a period of prolonged use cause the build up of a damaging surface layer.
- Metal surfaces should be cleaned in the same manner as for MFC surfaces.
- All stains should be removed at the earliest opportunity; this will make their removal considerably easier.
- Stains may be removed using a foam type of cleaner following the manufacturer's instructions. Always test a small area prior to cleaning large areas.
- Should an item become damaged beyond repair replacement items are available directly from Task Systems Ltd.
- Task Service staff may be contacted to undertake maintenance procedures on an annual basis, a small charge will be made against this work.

TASK SYSTEMS

TERMS & CONDITIONS / WARRANTY

TASK TERMS & CONDITIONS

GENERAL

(a) Task Systems Ltd. (herein after referred to as "the company") quote for and accept all orders subject to only the terms and conditions herein contained which are to the extent permitted by law to the exclusion of all other guarantees, conditions and warranties (including any as to quality or fitness for any particular purpose) whether express or implied by statute, common law or otherwise. In the event of customers' orders containing terms or conditions inconsistent with these terms of trading, the latter shall prevail.

(b) No addition or variation from these terms and conditions shall have effect unless the same is expressly accepted by the company in writing under the hand of a director of the company.

(c) The company's catalogues, price lists and other advertising matter shall not form part of any contract between the company and its customers.

(d) The company reserves the right to modify designs and specifications without prior notification.

WARRANTY

WARRANTY

Task Systems Ltd. products meet all relevant test criteria for strength, stability and ergonomics.

We offer a 5 year warranty for all soft seating, chairs and coffee tables, starting from the date of original installation. We offer a 10 year warranty for operator chairs. The warranty covers all manufacturing and component defects.

Task Systems Ltd. offer a full and comprehensive 10 year warranty period for workstations, workwall and storage commencing from date of delivery.

WARRANTY

TASK SYSTEMS LTD. DOES NOT WARRANT:

- Natural variations in wood grain or figure or the presence of character marks
- Changes in surface finishes due to aging or exposure to light
- Failure resulting from normal wear and tear
- Damage, marking or staining of veneer surfaces due to contact with rubber or similar compounds
- Damage from sharp objects or imprinting from writing instruments or prolonged exposure to direct sunlight

Our supply chain has been in operation for many years and is well structured and tested. It is our policy to dual source materials wherever possible thus avoiding any adverse risk exposure. Our supply chain is selected for its high standards and over the years we have worked in partnership to further enhance these standards.

We believe in open management and partner companies with a similar philosophy to ours.

All Task Systems Ltd. suppliers are constantly monitored and it is our policy to make regular visits to ensure the management and production process are in line with our standards.
