

SIMMTRONIC

TASK Project Reference
Completed Aug 2024

SIMMTRONIC

The Simmtronic office design project successfully merges the warmth of wood with the sleekness of industrial elements, creating a modern, dynamic workspace. The thoughtful integration of natural elements, collaborative spaces, and comfortable furnishings results in an office environment that is both inspiring and functional.

The office features an open-plan layout, accentuated by Lift EV benches, Hoxton MFC storage and ICF's Qadro Dividers in monochromatic tones. These elements, in combination with the abundant use of natural wood and plenty of plants create a harmonious atmosphere.

The breakout area is designed with relaxation in mind, featuring a combination of wooden elements that add warmth and texture to the space. The adjacent kitchen, designed in a sleek grey palette, is equipped with Sam stools, 85 series tables, Drift chairs and Mila Banquette Seating. This setup provides a comfortable space for casual meetings, meals, and informal gatherings, promoting a sense of community within the workplace.

The Simmtronic office design focuses on creating an inviting and productive environment that seamlessly integrates natural elements with modern materials, fostering a sense of well-being for employees.
