

LIFT3

SIT- STAND RANGE

The way we work is changing. Workplace is no longer an environment with predefined rules, but an agile and dynamic space that adapts to our demands and allows us to choose where and how we want to work.

Working environment based on choice and flexibility cultivates a strong workplace culture. By introducing sit-stand workstations we can encourage flexible and healthy working patterns, reduce sedentary behavior, decrease stress levels and improve overall wellbeing.

LiFT3

EFFECTIVE WORKPLACE

TASK have always welcomed a close working relationship with our clients to ensure that any furniture solutions offered are specifically tailored to suit their intended use.

Streamlined, compact and sustainably sourced, our LiFT3 sit-stand range with sleek cable management and FIRA certified strength

and stability, is a testament to our commitment to providing products of highest quality.

With our in-house product designer expertise and years of experience in supplying tailored sit-stand workstation solutions to major international clients, we can ensure height adjustable LiFT3 range meets any bespoke requirements perfectly.

LiFT3

CLEVERLY
DESIGNED

The overall assembly of the LiFT3 range has been smartly designed with all parts being fixed to the frame structure. This gives major advantage during any reconfiguration, move or when converting fixed height desking to sit-stand solution.

Continuous 25mm gap between top panel and screen to allow cable access, and peripheral mounting flexibility.

1100h screen height.
Bespoke height on request.

The Up /Down two-button controller. Also available with display for height read-out and memory to store.

J-shape cable tray with open front for simple access. Enclosed ends to minimise visual impact when raised.

Robust articulated chain cable management to give consistent performance and large capacity.

400h screen mount point to act as modesty element.

LiFT3

EXECUTIVE SOLUTION

LiFT3 range comes in a number of configurations; ranging from an efficient workstation system and an elegant single desk, through to a sophisticated workwall solution which provides a flexible and dynamic design for any executive office.

LiFT3

HOME OFFICE

LiFT3 is also available as a height adjustable standalone desk solution, well suited for an ergonomic home office set up.

LiFT3 DISC

BRING PEOPLE TOGETHER

Introducing **LiFT3 DISC**, an innovative height adjustable circular workstation.

Designed to bring teams together and foster collaboration in a workplace that encourages choice and flexibility.

LiFT3 DISC
DYNAMIC WORKPLACE

Create a purpose driven, engaging workspace, where teams can socialise and collaborate easily.

- 1. LiFT3 DISC sit-stand circular workstation.
- 2. GRID room divider with flexible storage options.
- 3. Biophilic design for health and wellbeing.
- 4. LOCKERS with optional open shelving and coat storage.
- 5. ARC mobile working wall with writing board and storage elements..

LiFT3 DISC
ENCOURAGE
WELLBEING

Designed with a central cable management tower and individually height adjustable segments which go up and down independently, encouraging flexible and healthy working patterns.

LiFT3

QUALITY ASSURANCE

At TASK we are committed to sustainable practices and are compliant with leading quality and environmental accreditations, including ISO 9001, ISO 14001, FIRA and FISP, the Furniture Industry Sustainability Programme.

Our LiFT3 sit-stand range comes with 10 year warranty period and complies with BS EN 527:1-2011 standard. It was also tested for Determining VOC Emissions and certified to BIFMA X7.1-2011.

LiFT3

ESTABLISHED & TRUSTED

It is our aim at TASK to meet your expectations with the correct solution. We have been awarded many prestigious projects over the recent years where our LiFT3 sit-stand has been a chosen workstation solution and our design team was able to react quickly and accurately non-standard product specifications and requirements.

Having in-house product designer at hand provide clients with a real sense of confidence in our ability to support them at every stage of the furniture procurement process, including developing special product component such as dedicated cable tray solutions, often required by an IT department of a global organisation.

“Over the last 40 years, we have successfully worked in this way with many high profile clients and on sizeable projects, most recently UBS AG, Maquarie Group, Amlin, Credit Suisse, Deutsche Bank, and State Street.”

- Tony Daltrey, Managing Director

INTERNATIONAL INVESTMENT BANK 6,000+ Workstation

Project featuring bespoke cable tray elements with extended & perforated cable tray and bespoke cable routing via e-chains developed by TASK product design team.

LEADING FINANCIAL GROUP 6,000+ Workstation

Project featuring large format shared low cable tray options with central access apertures featuring slide open doors of hinged flaps.

GLOBAL INVESTMENT BANK 7,000+ Workstation

Project featuring LiFT3 hybrid cable channels developed by TASK in-house product design team.

FINANCIAL SERVICES ORGANISATION 3,000+ Workstation

Project featuring bespoke upper cable tray with increased vertical size capacity and cable module mount slots on both the base and rear faces.

INVESTMENT BANK 2,000+ Workstation

Project featuring bespoke extended format upper cable tray with special e-chain arrangement.

DEDICATED PRODUCT DESIGN TEAM

At TASK we fully understand that a client chooses a supplier who they have the confidence in, to fully meet their expectations and deliver solutions tailored to each specific project.

Our professional, in-house design studio can support all stages of the specification process including bespoke requirements. Dedicated product designers are able to react quickly and accurately to both standard and non-standard product specifications, working closely with client's project team to deliver correct solution including developing bespoke components to add to our standard offering.

STUART COLLYER
Design Director

Stuart has been heading our design team for over 12 years now. He goes above and beyond our client's expectations on every single project and oversees product development process, from the very beginning through to completion.

SCOTT APPLEBY
Senior Product Designer

Scott works closely with Stuart to ensure product delivered meet exact project specifications. He works with suppliers to move from initial product ideas to production of prototype to full production of final product.

LiFT3

SUSTAINABLE PRODUCT

We are extremely proud of our transparent supply chain and can assure our clients that all LiFT3 range components are manufactured by our partners based in Germany and in the UK, ensuring high quality and product durability in conjunction with recyclable-friendly design.

The quality and handling of materials and supplies has been assured by ISO 14001, ISO 9001 and ISO 50001 standards and the Furniture Industry Sustainability Programme (FISP).

The use of recycled material in both steel and chipboard is monitored on regular basis and all wood supplied by us is FSC certified.

Metal and desktop components of the LiFT3 workstation range are up to 95% recyclable which helps prevent the scrap metal hitting a landfill and recirculate it in a useful way. Managing resources efficiently is our top priority.

TASK LiFT3 workstation range and all associated components are tested under BIFMA M7.1-2011 Test Method for Determining VOC Emissions from Office Furniture Systems, Components and Seating, and certified to BIFMA X7.1-2011.

Components are delivered using bulk packaging method to reduce the amount of packaging material required and reduce the carbon footprint associated with the transport.

REFURBISHMENT & UPCYCLING

MADE TO LAST

The most sustainable thing we can do with design is maximise the lifespan of the products we manufacture.

We therefore design every component and sub-assembly with service in mind, ensuring that all components can be easily repaired or replaced.

REFURBISHMENT & UPCYCLING

We are able to provide refurbishment and upcycling services for existing products whether they be TASK supplied or third party. With previous projects we have overseen the dismantling, cleaning, refinishing and then re-assembly of tired or damaged existing product.

Just recently as part of an ongoing installation at client's new HQ building, as well as the supply of the new desking TASK supplied a large number of matching top panels and screen panels to be fitted to existing third party frames so they can be reused throughout the new scheme.

CHARITY DONATIONS

We work to support the re-tasking or recycling of surplus furniture that client may be looking to dispose of. We aim to increase the amount of furniture recycling and promote furniture donation within our clientbase.

For example, we previously brokered the re-tasking of 400 operator chairs surplus to requirement from various client buildings across London, where they were repurposed throughout the estates of a well known charity organisation.

ORGANIC BLADE SCREEN

SCREENS FOR LIFT3

P26
Screen with single top rail

Depth: 26mm
Screen length the same as length of the desk.

C32
Screen with plain top cap

Depth: 32mm
Screen length the same as length of the desk

BLADE
Plain upholstered screen

Depth: 30mm
Screen length 200mm shorter from each side than the desk.

ORGANIC BLADE
Upholstered screen with metal trim

Depth: 30mm
Screen length 200mm shorter from each side than the desk.
